Rediscovering Value: Leading the Enterprise to Sustainable Success

Businesses must deliver services/products that customers value, using limited resources efficiently, while ensuring long-term success and profitability. But value doesn't just happen. A 3D organization considers the three key dimensions of business alignment, process management and value creation in achieving success. All managers must balance resources and rethink value across a very complex system of work. This workshop provides practical advice and useful tools to improve top-line performance and for transforming your organization into a sustainable 3-D enterprise.

Friday, April 1, 2011

8:30 am – 4:30 pm

Goodwill Community Center

1015 Norwood Park Blvd, Austin, TX 78753
